

# Using IATI data to enhance Bangladesh's AIMS

Mark Brough  
mark@brough.io

IATI Members' Assembly  
June 2016

# Handling DPs' data

- We can currently handle data from the following DPs:
  - AsDB
  - Belgium
  - **DFID**
  - **Canada**
  - **EIB**
  - **EU**
  - GAVI
  - **Global Fund**
  - **Netherlands**
  - **Sweden**
  - Switzerland
  - UN Habitat
  - **UNDP**
  - World Bank
  - **WFP**
- Also working with Germany and USAID to improve their data.

# Avoid double counting

🏠 AIMS IATI Import Restart almslat

- 🏠 Begin import
- ☰ 1. Select project structure
- ▼ 2. Filter relevant projects
- ▼ 3. Implementing organisations
- 🔗 4. Review matched projects
- 🔗 5. Set import preferences
- 🔗 6. Review and import

## 3. Implementing organisations

We need to map your projects' implementing organisations to those already captured in the AIMS. In order to avoid double-counting, we also need to establish which of your projects are managed by other DPs.

3.1 Determine organisation | 3.2 Determine Managing DP

### Determine Managing DP

We need to establish which of your projects are managed by another DP. Using your answers in the previous step, we have tried to automatically determine this for you to review, but please check carefully.

Project ID	Project Title ▼	Implementing organisation	Managed by
NL-1-PPR-24008	Water Sanitation, Health WOP	Vitens International	Netherlands
NL-1-PPR-24475	Water Sanitation, Health MAX	World Food Programme	World Food Programme
NL-1-PPR-23167	Water Sanitation, Health BRAC	Population Council	Netherlands
NL-1-PPR-24633	Water Sanit.,Health UNICEF	United Nations International Children's Emergency Fund	United Nations International Children's E

*Netherlands data*

# Recommendations: partner countries

1. Push vendors to provide IATI compatibility
2. Take a pragmatic approach to using IATI
3. Take steps to prepare for IATI import

# Recommendations: DPs

1. Improve data quality
2. Prioritise support for (and fund) more work to use IATI data in country systems
